The Company believes in nurturing talents & supporting each Franchise by providing Continuous Training Support till he/she becomes independent in terms of all the service aspects.

Abacus is a simple tool or a hardware used for performing rapid arithmetic calculations. Calculation based on abacus was invented in the ancient times and now widely used as a brain development programme. It consists of a rectangular frame holding a number of vertically arranged rods, on which beads slide up and down.

- One of the most popular calculating methods from ancient times.
- Children do fast calculations in mind by visualizing Abacus bead movements.
- Researches prove that Abacus learners use both sides of the brain- left hemisphere & right hemisphere.
- Highly effective in improving the concentration level of children.

Why we give abacus education?

- Mental arithmetic Calculations
- Improves Concentration skills
- Improves imagination skills
- Sharpen memory power
- Boost confidence
- Personality Development
- Positive attitudes
- Multitasking
